LARGE CAPACITY WEAPON ROSTER EFFECTIVE 02-15-2002

Supersedes All Previous Rosters

This roster has been compiled in accordance with M.G.L. c.140, §131¾. It contains weapons determined to have been originally manufactured for the civilian retail consumer market as large capacity weapons as defined by § 121 of chapter 140. Weapons not listed on this roster may also be large capacity weapons if they are semi-automatic, and are capable of accepting or readily modifiable to accept a large capacity feeding device.

For the purposes of M.G.L. c.140, §121, "Capable of Accepting" shall mean any firearm, rifle or shotgun in which a large capacity feeding device is capable of being used without alteration of the weapon; provided, however, that said feeding device is fully or partially inserted into the weapon or attached thereto, or is under the direct control of a person who also has direct control of a weapon capable of accepting said feeding device.

For the purposes of M.G.L. c.140, §121, "Readily Modifiable to Accept" shall mean any firearm, rifle or shotgun immediately capable of being altered so as to accept a large capacity feeding device; provided, however that said feeding device is fully or partially inserted into the weapon or attached thereto, or is under the direct control of a person who also has direct control of a weapon capable of accepting said feeding device.

NOTE: Unless otherwise exempted by §121, the term "large capacity weapon" shall apply to all semiautomatic weapons equipped with a large capacity feeding device, including any such weapons not listed on this roster.
